

## VDPU-MD24220-21A-P

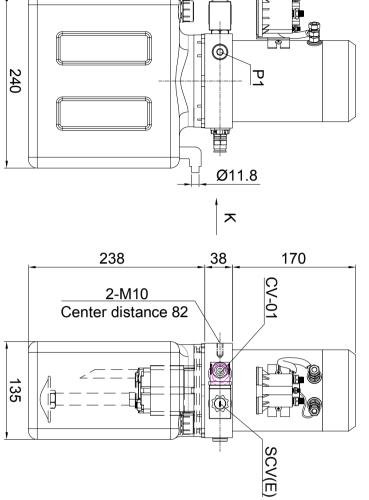

This power unit is mainly used in the full-electric stacker truck, and the lifting andlowering function of the stacker truck is realized by the unit. The unit integrates DC motor, helical gear pump and hydraulic oil tank in one, including solenoid valve for emergencydescent and quantitative type pressure compensation valve to realize the smooth descent of stacker truck, with low noise of hydraulic system and easy installation and operation.

#### Technical Attributes

Oil Port	Tank Capacity	System Pressure	Pump Capacity	Rated Speed	Motor Power	Motor Voltage	Model Code	
G3/8 "	5L	20MPa	2.0mL/r	2800rpm	2.2kW	24V	VDPU-MD24220I-21A-P
